

LONG-LASTING, MOISTURIZING HAND SANITIZER

Persistent Sanitizer

Invisi-Shield™ works quickly to kill and continuously protect against the growth and spread of bacteria throughout the day.

Long Lasting

Invisi-Shield™ stays active even through routine hand-washing. Only 2-3 applications per day vs. 15-20 with traditional hand sanitizers.

Alcohol Free

Won't burn or irritate skin with repeated use.

FDA Approved

Ingredients

No More Dry Skin

Invisi-Shield™ is made with Jojoba Oil & Aloe to seal in moisture and further protect the skin.

The active ingredient in **Invisi-Shield™** is **Benzalkonium Chloride (BAC)**, an alcohol-free disinfectant that can kill bacteria and fungi. BAC is *non-toxic, non-teratogenic and non-carcinogenic*. BAC dissolves slowly in water—meaning it won't stop working after routine hand-washing.

Invisi-Shield™ is also made with **Demethicone, Jojoba oil and Aloe**; seals in hydration while keeping out external irritants helping the BAC stay active longer. Both Jojoba and Aloe carry natural anti-bacteria & fungal properties.

Jojoba seals the skin with a protective barrier to keep it from losing moisture while preventing bacterial and fungal infections from growing and spreading.

Aloe is shown to be effective against common bacteria and fungi while soothing and moisturizing skin up to 7 layers deep.

These ingredients allow **Invisi-Shield™** users to reap the benefits of consistent anti-microbial protection without dry, cracked or burned skin.

Kills >99.9% of Germs
